Ayurveda the science of life is a 5000 year old medical system. We at Ayurgreen focus on Ortho Neuro Rehabilitation utilising the Goodness of Ayurveda and the Great research and Technology in Modern Systems including Robotics and Artificial intelligence. The medical systems compliment to achieve an individual Goal set for each patient which augments the Recovery when compared to conventional treatments

PHYSIOTHERAPY TREATMENTS

Physiotherapy helps to restore movement and function when someone is affected by injury, illness or disability. It can also help to reduce your risk of injury or illness in the future. Physiotherapy rehabilitation aims to optimise patient function and well-being, to help integrate that patient back into their chosen lifestyle activities whether at home, work or leisure. Rehabilitation should focus on changes to functional disability and lifestyle restrictions based on the patient's own goals for functional improvement. Physical Rehabilitation can be used for recovery from injury or disease and also for the management of long-term conditions. Physiotherapy should start as soon as possible to speed recovery.

THERAPY APPROACHES

- Motor Control and Motor Learning
- Activity Based Restorative Training
- Neuro Developmental Therapy
- Neuro Muscular Re-education
- Neuro Muscular Facilitation
- Inhibition Therapy
- Functional Release Therapy
- Neuro Fascial Release
- Fascial Stretch Therapy
- Motor Re-learning
- Strengthening Program
- Gait Training
- Balance and Vestibular Training
- Proprioceptive Neuro Muscular Facilitation (PNF)
- Manual Mobilisation and Manipulation
- Locomotor Training
- Suspension Therapy
- Constraint-Induced Movement Therapy (CIMT)
- Dysphagia Management
- Bladder & Bowel Management
- Wheelchair Management and Training
- Comprehensive Training
- Aerobic Training
- Hydrotherapy – Aquatic Training
- Assistive & Supportive Devices
- Hand Rehabilitation
- sEMG Biofeedback
- Coordination Exercises

SPINE CARE

- Digital Traction System
- Spinal Mobilisation
- Manual Therapy
- Postural Corrections

WOMENS HEALTH

Prenatal and Postnatal Exercises
Incontinence Management
Lymphoedema Management
Varicose Vein Management
Osteoporosis Management
Postmenopausal Issues

HYDROTHERAPY

Aquatic Training in Swimming Pool
(Ladies and Gents Separate Pools)
Underwater Treadmill – AquaCiser III
Aquatic Exercises

ROBOTIC ASSISTED REHABILITATION

Robotic Gait Training
(G-EO System, Switzerland)

Robotic Arm Trainer
(Armotion, Switzerland)

Neuro Muscular Rehabilitation and
Assesment (Huber 360, USA)

Functional Electrical Stimulation
Visual Scenario with Robotic \ Assisted Walking

SPEECH THERAPY
PAEDIATRIC OCCUPATIONAL THERAPY
PAEDIATRIC PHYSIOTHERAPY
INDOOR AND OUTDOOR GYM

WEIGHT REDUCTION PROGRAMME

Slimming Therapy
Electronic Muscle Exerciser

PAIN MANAGEMENT

Ultrasound Therapy
Short Wave Diathermy
TENS
Paraffin wax Therapy
Deep Heat Therapy
Laser Therapy
Interferential Therapy
Combination Therapy
Vacuum Therapy
Dry Needling
Fascial Manipulation
Kinetic Chain Activation Techniques
Instrument Assisted Soft Tissue Manipulation
Functional Integrated Taping

OCCUPATIONAL THERAPY

Occupational Therapy addresses the physical, cognitive, psychosocial, sensory-perceptual, and other aspects of performance in a variety of context and environments to support engagement in occupations that affect physical and mental health, well-being, and quality of life.

TREATMENTS

Hand Function Therapy

Fine & Gross Motor Training

ADL Training

Cognitive Rehabilitation

Hand Writing Therapy

Functional Ability Training

Sensory Integration Therapy

Developmental Therapy

Visuo-perceptual Skill Training

Psychotherapy

Group & Play Therapy

Behavior Therapy

Cognitive Behavior Therapy

Brain Gym Activity

Ergonomics

Training through Adaptive and assistive Technology

ROBOTIC HAND TRAINER

Hand Robot System use innovative Soft Robotic Exoskeleton Technology which combines Passive and Active Integration Training, which could accelerate the hand recovery process in terms of grasp, hold-release, prehension, manipulation, dexterity and finger strength both orthopaedical and neurological condition.

ADL TRAINING

ADL stands for Activity Of Daily Living. This means what an individual does for his/her living i.e. getting up in the morning, till going to the bed at night.

TREATMENTS

Feeding Technique Practice
Dressing Technique Practice
Toilet Training
Training for Bathing
Ambulation (Transfer & Locomotion Training)

Driving and Community Mobility
Training for Communication

VIRTUAL REALITY IN REHABILITATION

Ayurgreen Hospital is breaking new ground in Neuro Rehabilitation! We're thrilled to pioneer Immersive Virtual Reality (VR) technology, redefining the landscape of Neurological Care. Our VR sessions offer personalized exercises in a virtual world, enhancing engagement and tailoring therapy to individual needs to regain motor skills, balance, coordination, cognitive abilities, and overall well-being. From stroke rehab to movement disorders, Ayurgreen is accelerating recovery while embracing innovative healthcare solutions. Join us on this journey of transformation!

Robotics has indeed revolutionised the physiotherapy arena by incorporating advanced machines in the rehabilitation process that result in better outcome. Robotics facilitates and expedites the rehabilitation process by increasing patient's mobilisation using expert machines. Ayurgreen hospital is well equipped with some of the best available robotic machines in the world that accelerate the rehabilitation process, saving time and efforts.
